CRO SERVICES FOR
AESTHETICS CLINICAL RESEARCH

CRO SERVICES FOR AESTHETICS CLINICAL RESEARCH

EXTENSIVE EXPERIENCE

PMI has been the CRO of choice for a variety of aesthetics clinical research projects with clients that range from early-stage companies to industry leaders. Our aesthetics project experience includes early stage/feasibility, pivotal, investigator-led and post-market studies. Services provided include overall project management, clinical site management and monitoring, data management, biostatistics and medical writing support for surgical therapies and personal use products associated with:

- Breast reconstruction
- Breast augmentation
- Body contouring
- Facial toning
- Eyelid reconstruction
- Non-spectacle vision correction (LASIK refractive procedures, corneal/scleral inlays, contact lenses, etc.)

BROAD ARRAY OF SERVICES

PMI consistently delivers professional quality services while maintaining diligence to established procedures, timelines and budgets. We support our clients' projects with a range of specialized clinical research and marketing services including:

- Project management
- Clinical study management
- Data management
- Biostatistics
- Medical writing
- Research compliance
- Strategic marketing consulting

SPECIALIZED PROCEDURES AND GLOBAL RESOURCES

We understand that the design and implementation of aesthetics studies differs from studies in other medical specialties.

Our ISO-certified systems include plans, procedures and templates customized for aesthetics projects. Our staff is familiar with the nuances associated with aesthetics patient retention as well as the terminology, exams and instrumentation used in associated practices. Additionally, we maintain an extensive network of investigators and globally-based resources.

These assets allow us to rapidly develop comprehensive project plans and quickly assemble skilled, highly-rated* project teams to partner with our clients for optimal success.

*In accordance with our commitment to continual improvement, PMI's project teams are regularly assessed in terms of performance, reliability, responsiveness, professionalism and fairness by our clients and study sites.
