CRO SERVICES FOR
MEDICAL DEVICE CLINICAL RESEARCH

CRO SERVICES FOR MEDICAL DEVICE CLINICAL RESEARCH

EXTENSIVE EXPERIENCE

PMI has been the CRO of choice for a variety of medical device clinical research projects with clients that range from early-stage companies to industry leaders. Our project experience includes feasibility, pivotal and post-market studies for devices associated with:

- Cataract and refractive surgery
- Glaucoma surgery
- Age-related macular degeneration
- Retinal tear management
- Non-surgical treatment of myopia and hyperopia
- Coronary artery occlusion
- Congestive heart failure
- Whole blood analysis
- Blood gas and chemistry monitoring
- Influenza diagnosis
- Orthopedic, spine and trauma surgery
- Cerebral arteriovenous malformation treatment
- Breast biopsies, as well as breast reconstruction/augmentation
- Body contouring/facial toning

BROAD ARRAY OF SERVICES

PMI consistently delivers professional quality services while maintaining diligence to established procedures, timelines and budgets. We support our clients' projects with a range of specialized clinical research and marketing services including:

- Project management
- Clinical study management
- Data management
- Biostatistics
- Medical writing
- Research compliance
- Strategic marketing consulting

SPECIALIZED PROCEDURES AND GLOBAL RESOURCES

We understand that medical device studies differ from studies of pharmaceutical products.

Our ISO-certified systems include plans, procedures and templates customized for device projects. Our staff is trained on 21 CFR Part 812 clinical study requirements and knowledgeable about operating suite activities and procedures. Additionally, we maintain an extensive network of investigators and globally-based resources.

These assets allow us to rapidly develop comprehensive project plans and quickly assemble skilled, highly-rated* project teams to partner with our clients for optimal success.

*In accordance with our commitment to continual improvement, PMI's project teams are regularly assessed in terms of performance, reliability, responsiveness, professionalism and fairness by our clients and study sites.
