CRO SERVICES FOR
OPHTHALMOLOGY CLINICAL RESEARCH

CRO SERVICES FOR OPHTHALMOLOGY CLINICAL RESEARCH

EXTENSIVE EXPERIENCE

Since 1985 PMI has been the CRO of choice for more than 100 ophthalmology device, biotech and pharma studies. Our client list includes industry leaders, early-stage companies and private practitioners. Our projects include surgical and medical therapies for:

- Age-related macular degeneration
- Cataract
- Eye allergies and infection
- Glaucoma
- Macular edema
- Ophthalmic wound healing
- Proliferative vitreoretinopathy
- Refractive disorders
- Vitreous hemorrhage

BROAD ARRAY OF SERVICES

PMI consistently delivers professional quality services while maintaining diligence to established procedures, timelines and budgets. We support our clients' projects with a range of specialized clinical research and marketing services including:

- Pre-clinical research*
- Project management
- Clinical study management
- Data management
- Biostatistics
- Medical writing
- Research compliance
- Strategic marketing consulting

*via our alliance with Iris Pharma

SPECIALIZED PROCEDURES AND GLOBAL RESOURCES

Our ISO-certified systems include plans, procedures and templates customized for ophthalmology projects. We maintain an extensive network of research ophthalmologists and globally-based industry resources. Our staff is familiar with the terminology, exams and instrumentation used in ophthalmology and the nuances of patient recruitment and follow-up. These assets enable rapid assembly of skilled, highly rated* project teams that partner with our clients.

*In accordance with our commitment to continual improvement, PMI's project teams are regularly assessed in terms of performance, reliability, responsiveness, professionalism and fairness by our clients and study sites.
